**PEEK BEHIND THE TECHNOLOGY CURTAIN – “SEEING IS BELIEVING”
COMING TO FARMINGTON HILLS**

Pontiac, MI - 4/15/08 - Sometimes information technology can seem like pulling a virtual rabbit from a hat. Right in front of your eyes technology changes and you have no idea how it happened. You trust the people you hire to make the right decisions for your technology needs, but it still can seem like magic. Seeing is Believing comes to Farmington Hills on Friday, May 2 and is open to businesses and organizations to view the latest technology Microsoft currently offers and get expert advice from certified Microsoft partners.

A 42-foot “showcase on wheels” will be available for tours and is fully equipped with the latest innovations from Microsoft, HP, Intel and others. It features complete state of-the-art software and hardware solutions for small and mid-sized businesses. Along with the truck tours, guests will experience technology first-hand, discover many new ways to enhance their business through mini-presentations, be introduced to trusted, technology partners and receive one-on-one consultations if desired.

A collaboration of three Microsoft Certified Partners is ready to help you believe what you don’t always see. Atrio Systems (www.atriosystems.com), ZenaComp Incorporated (www.zenacomp.com), and Madre Software (www.madresoftware.com) have joined together to take the guess work out of your technology solutions. These Microsoft partners will host Seeing Is Believing at the Oakland Campus of Wayne State University. From 1:00 to 4:30 p.m. this event, which is open to the business community, will feature the Microsoft Across America Tour

and mini-presentations highlighting Microsoft Dynamics CRM 4.0, Microsoft Exchange Server 2007 and Microsoft Dynamics NAV. Julie Piazza, coordinator of the event, stated, “We want to provide our guests an enjoyable and interactive setting.

Sorting through all the automated business solutions available can be overwhelming and we want to help businesses sort through their dilemmas and understand their options in a productive and entertaining way!” Atrio's managing partner, Brian Demoe, feels that this is an excellent opportunity for business to evaluate CRM, ERP and infrastructure technologies. Demoe further explains, “Business owners and technology decision makers want to be able see the options available before they invest in technology for their businesses. Having these solutions available all in one place provides that opportunity in a non-threatening environment. Seeing really is believing.” To register or learn more about the Seeing is Believing event, call Barb Roberts at (248) 874-1758 x10.
